Benefits of expansion

7 Please see section 2 of our Consultation Brochure, which explains the current benefits of the airport and the additional benefits that we believe expansion would bring to local and regional communities. Further details can be found in our Draft Need Case document, and our Draft Employment and Training Strategy document.

Do you have any comments or suggestions for how we might maximise employment, skills, community and social benefits and training opportunities to help benefit neighbouring communities? *Please add your comments in the box below:*

Our proposed design for the airport

8 Please see section 3 of our Consultation Brochure, which outlines our proposed design for the airport. Further details can be found in our Works Description Report.

We have made changes to our design since the 2019 statutory consultation. These are summarised in section 3 of the Consultation Brochure and include:

- new sustainability design measures including making Terminal 2 a net zero building and rainwater harvesting
- changing the approach to Wigmore Valley Park to preserve more trees, biodiversity and heritage assets
- reduction in the size of the airfield platform and the amount of earthworks
- other improvements such as reconfigured taxiways, realigning the position of the new stands, reducing the size of hardstanding associated with the engine run up bay and a new access road to the Fire Training Ground
- additional enhancements to Terminal 1

Do you have any comments on our design proposals for the scheme?
Please add your comments in the box on the next page:

Getting to the airport

9 Please see section 4 of the Consultation Brochure, which explains our proposals to enable people to get to and from the expanded airport including:

- Airport Access Road
- Junction upgrades/other road improvements
- Luton DART extension
- New separate coach station will be provided at Terminal 2
- Targets for public transport mode share
- User charging for car park and forecourt access

Further details can be found in our Getting to and from the airport – emerging transport strategy.

Do you have any comments on our proposed Getting to and from the airport – emerging transport strategy? Do you have any suggestions for how we can maximise access to the airport by public/sustainable transport modes? *Please add your comments in the box below:*

Building our airport

- 10 We propose to construct the scheme in two phases. Phase 1 would include expansion of the existing Terminal 1 and additional aircraft stands and car parking. Phase 2 would the see the construction of Terminal 2 and associated facilities.

Please see section 5 of the Consultation Brochure, which outlines how we propose to build our airport expansion. Further detail can be found in our Works Description Report.

Do you have any comments on our proposals for constructing the scheme?
Please add your comments in the box below:

- 11 Our proposals also include a Draft Code of Construction Practice which sets out in draft the measures we will take to minimise the effects of construction. Is there anything else you would like us to consider as part of this? Please add your comments in the box below:

The environment

- 12 Please see section 6 of the Consultation Brochure, in which we identify the key environmental effects that expanding the airport could have, and how we are proposing to manage and mitigate them. Further detail can be found in our Preliminary Environmental Information Report (PEIR).

Do you have any comments on the environmental effects of expansion and how we propose to manage and mitigate them? Please add your comments in the box below:

- 13 We are proposing a 'Green Controlled Growth' framework which would ensure that the airport is required to operate within specified 'limits' for air quality, noise, surface access and greenhouse gases. Section 3 of the Consultation Brochure describes the approach and further detail can be found in our Draft Green Controlled Growth Proposals document.

Do you have any comments on our Green Controlled Growth approach? Please add your comments in the box below:

Open space

14 Please see section 6 of the Consultation Brochure, which explains our approach to landscaping and open space as part of our plans to expand the airport. Our proposals include landscaping and ecology improvements, including the replacement of existing and planned public open space at Wigmore Valley Park.

Do you have any comments on our open space and landscaping proposals?
Is there anything else you would like us to incorporate? *Please add your comments in the box below:*

Compensation and Community First Funding

15 Section 7 of the Consultation Brochure outlines our compensation proposals. We recognise that some people who live, or own property, near the airport will be affected by its expansion. We have prepared a Draft Compensation Policies and Measures document to explain our general approach to property and land acquisition, which also sets out the discretionary compensation available for eligible properties. Since the 2019 statutory consultation we have reduced the thresholds at which people can apply for noise insulation – this means that many more people are now eligible. These discretionary offers are intended to enhance the terms available under the statutory compensation code for eligible properties, but do not change your statutory rights.

Do you have any comments on our proposed compensation policies and measures?
Please add your comments in the box below:

16 In our last statutory consultation in 2019 we set out how we wanted to go further than simply mitigating the negative effects of expansion and proposed a new fund which we called FIRST.

We still propose to establish a similar fund and in line with our social and environmental ethos, we now propose more focus on areas of high deprivation in the region and by helping to finance local decarbonisation projects. As well as fitting better with our own values, we also believe this approach is better aligned with the national levelling up and decarbonisation agendas promoted by the government. To better reflect this revised approach, we have renamed the fund ‘Community First’.

You can read more about our Community First proposals in our Compensation Policies and Measures document.

Do you have any comments about our proposals for the Community First scheme?
